

BATHYS HAWAII LUNAR WAHINE INSTRUCTIONS:

Directions for setting the time, date and moonphase:

1. Use the chart on the right or other source to determine the current phase of the moon.
2. Pull the crown to position 3 and turn to advance the hour hand past midnight - notice that at midnight for each day the moon phase will move slightly ahead. There is no "quick set" for the moon phase as there is for the date. Continue advancing the time day by day until the display is just prior to the correct moon phase.
3. Once the correct moonphase is close, note when midnight is, and after midnight has rolled over (and the moonphase is now correct), then move to position 2 and set the date.
4. Once the date is set correctly, then set the time correctly.
5. Once set, the moonphase will remain accurate for 8 years.

Functions

- 1 Running position (without function)
- 2 For date correction
Stop-seconds with interruption of the motor impulses
For setting the moon phase
- 3 For setting the hands
Prohibition: do not use quick change date function between 21.30 and 03.00 h
